Work History:

Designation:- Software Developer

Tudip Technology Pune, Maharashtra

Awards : Received **Rocking Debut Award** for outstanding contributions (May 2024)

Project Name: TATA New FD Based Credit Card Application

Role: PL/SQL Developer

Client Name : HDFC BANK-DEPOSITS

- **Objective:** Worked on the **TATA NEU FD-Backed Credit Card** project, which enables customers to avail credit cards against fixed deposits, ensuring low-risk credit issuance. The journey was seamlessly integrated across major platforms like **PayZapp**, **Paytm**, and **Swiggy**, expanding the reach and accessibility of the FD-backed credit card facility.
- Designed & optimized PL/SQL packages and stored procedures, reducing data retrieval time by 30%.
- Automated customer onboarding workflow, enabling real-time FD-linked credit card creation.
- Implemented indexing and query tuning, improving database performance by 40%.
- Enhanced data security by enforcing role-based access and audit logging.

Project Name: Video KYC

Role: PL/SQL Developer

At Client Location : HDFC BANK-DEPOSITS

- **Objective:** As opposed to physically visiting a bank, you can complete your account opening digitally through Aadhaar OTP based E-KYC and then click and connect on a video call with bank officials for an audio-video based verification.
- Developed & optimized database logic for Aadhaar-based KYC validation, reducing processing time by 50%.
- Implemented API integrations to fetch and store video verification data securely.

Project Name: MHA Fraud Data Reporting**Role:** PL/SQL Developer**At Client Location : HDFC BANK-DEPOSITS**

- **Objective:** The MHA Fraud Data Reporting API is an interface that the Ministry of Home Affairs (MHA) uses to report fraud to HDFC Bank. The API is used when the beneficiary account is with HDFC Bank.
- Developed & optimized database logic for MHA Fraud Data Reporting, reducing processing time for faster response.

Project Name: Fetch Satellite Data with Sentinel Sat**Role:** Backend Developer

- Framework: Built on **Python**(Flask) for efficient web development and data handling.
- Database: Utilised **MySQL** for robust and structured data storage.
- Objective: Implemented a system to fetch satellite data using Sentinel Sat **API**, providing real-time data insights.
- Key Contributions: Developed endpoints in Flask to interact with Sentinel Sat **API**, integrated data retrieval processes with **MySQL** database for seamless data management.
- Outcome: Enabled the retrieval and storage of satellite data for analysis and visualisation in real-time applications.
